

# CRITICAL PATH

SUMMER 2009

## INTERIORS GROUP CRAFTS UNIQUE SPACES FOR RETAILERS

### *SmashCut Studio*

Photo courtesy of Dave Davidson

Located in the heart of the Pearl District, R&H performed a tenant improvement for SmashCut Studio hair salon. The salon features many unique elements such as a freestanding "color cube" that is back lit with resin panels and an in-house film studio. Fletcher Farr Ayotte served as the project architect.

## IN THE COMMUNITY

### *R&H Builds Bookshelves for Local High School*

R&H and two of our subcontractors, Uncommon Cabinetry and Torgerson Painting, donated extensive shelving, including painting and installation labor, for the De La Salle North Catholic High School library. The team stepped in to help the school, which had no shelves to store a large number of donated books.

Working in coordination with our client Unitus Community Credit Union, R&H's Financial Institution Group completed the installation on June 20th. The entire

team was pleased to be able to help the school that provides ethnically diverse youth opportunities to succeed.

### *Aritzia*

R&H was selected to build Aritzia's first store in Oregon, located within the Washington Square mall. Based out of Vancouver, B.C., Aritzia mixes art and fashion within boutique retail locations throughout the U.S. and Canada. The store's design was handled by Aritzia's in-house staff.

Sinju Sushi restaurant is now serving patrons at its new location within Clackamas Town Center. The 5,700 s.f. tenant improvement is the largest of Sinju's three locations and includes superior finishes throughout. Ankrom Moisan Associated Architects was the project architect.

# Breaking Ground on . . . THE CLARK FAMILY CENTER

R&H broke ground April 30th on Catholic Charities' Clark Family Center on SE Powell. When complete, the 60,000 s.f., 4-story complex will be the cornerstone of the organization's campus and house operations for nearly all of its programs and services.

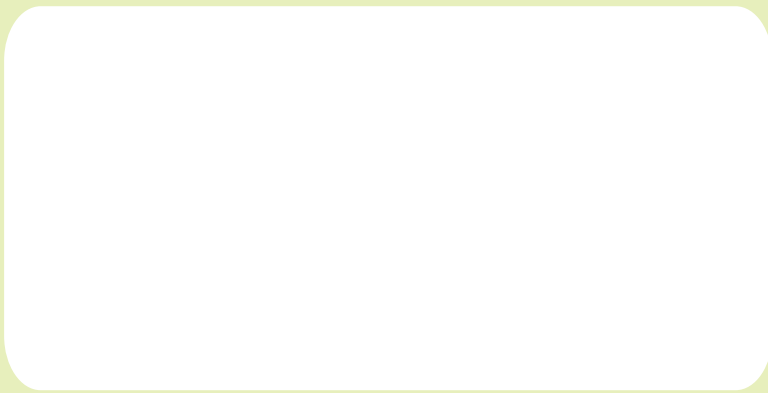

Working in coordination with Lundin Cole Architects, R&H is incorporating many sustainable elements into the project including energy conservation measures, bike parking, showers for cyclists, charging stations for electric cars, the use of EnergyStar appliances, exterior metal sunshades and extensive jobsite recycling.
