

CRITICAL PATH

FALL 2010

R&H Completes 10th New Seasons Market

Team members gather for an onsite "Safety Break"

FOCUS ON SAFETY

Safety plays an integral role on all R&H jobs. Good things don't happen by accident and R&H takes every step possible to provide a safe environment for our crews, clients and the community as a whole. We utilize a behavior-based safety program, a company-wide wellness program, hold monthly employee safety training, and have strong backing from upper management to make our program a success.

Our team's efforts have paid off . . . **The last two years have been the safest years in our 31 year history!**

R&H crew members attend one of the company's monthly safety seminars to learn about fall protection safety from guest speaker Jeff Johnson with ACME Construction Supply.

R&H recently completed the tenth New Seasons Market on SE Hawthorne Boulevard. Designed by LRS Architects, the 18,000 s.f. store reflects the look and feel of the surrounding urban neighborhood and includes a full service deli with a 100% reclaimed timber counter top, a walk-up coffee bar, outdoor dining area, produce and grocery departments.

Unique to this location is roof-top parking for 35 vehicles, helping to lessen on-street parking needs in the residential area.

R&H's involvement with New Seasons spans a decade, since the grocer's founding. Senior Project Manager Ev Galloni, who has played a key role in the construction of all ten of the stores, noted "we have a true partnership approach with New Seasons. From site planning and schematic design to the completion of construction, we work closely with New Seasons to craft markets that are unique to the neighborhoods they serve."

THE LINE-UP

R&H has been a member of New Season's construction team on all ten of the stores:

1. Raleigh Hills
2. Sellwood
3. Concordia
4. Orenco Station
5. Seven Corners
6. Arbor Lodge
7. Mountain Park
8. Cedar Hills Crossing
9. Happy Valley
10. Hawthorne

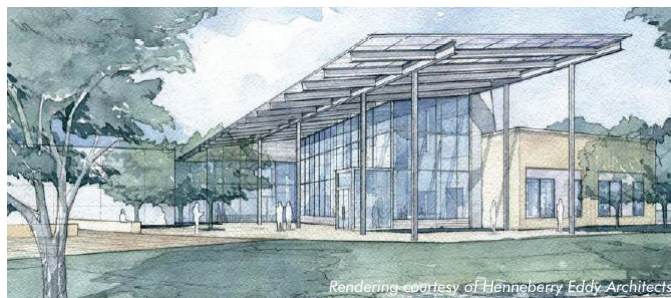

The flagship store, Raleigh Hills

GROUNDBREAKING: PCC NEWBERG CENTER

On October 13th, a large crowd assembled to commemorate the groundbreaking of Portland Community College's newest addition; the Newberg Center. Designed by Henneberry Eddy Architects, the center will feature 12,000 s.f. of classrooms and administrative offices, helping the college solidify its roots in the Yamhill County area.

As a Net-Zero project, the Newberg Campus aims to produce as much energy as it uses. A 7,000 s.f. rooftop photovoltaic array will convert solar energy into electricity. Additional sustainable elements include extensive use of natural daylighting, an airtight building envelope design and a natural ventilation system.

R&H has teamed with Colas Construction to serve as general contractor on the project that is scheduled for completion in the fall of 2011.

PCC'S ETAP PROGRAM HONORS R&H

PCC's Evening Trades Apprenticeship Preparation (ETAP) training program recently honored R&H as its Workforce Partner of the Year. R&H values this strong relationship and the opportunity to encourage self-sufficiency through the hiring and training of ETAP program participants.
